List of antioxidants in food - Wikipedia Natural phenols are a class of molecules found in abundance in plants. Flavonoids [edit] Flavonoids , a subset of polyphenol antioxidants , are present in many berries , as well as in coffee and tea. Naturally Occurring Antioxidants | Clinical Gate Antioxidants inhibit the oxidation of target molecules by radicals and ROS. 58 There is an apparent "pecking order" among antioxidants; some are more readily oxidized than others and will be consumed rapidly unless replenished or recycled. 59 Certain antioxidants are preventive inhibitors that block the initiation of free radical attack. Preventive inhibitors include defensive enzymes such as catalase, SOD, and peroxidases (GPx), as well low-molecular-weight compounds, including reduced GSH. Naturally Occurring Antioxidants - Google Books Naturally Occurring Antioxidants reflects the growing interest in these compounds among the scientific community. This book explores how quantitative measures can provide a more complete understanding of important substances and their reactions, allowing us to address some crucial environmental and health questions.
